

How to “Ping” an IP address

<p>Open the “Start” menu Click “Run”</p>	
<p>Type “cmd” and press “OK”</p>	
<p>A new window appears Type “ping “ and the the IP address you are looking for Press “Enter” on the keyboard</p>	
<p>Usually it tries 4 times to contact the IP. If it could contact it tells “Reply from xxxx...” If it could not find the IP in this network it writes “No reply”</p>
